

2025/2026

PLAYGROUND

and Outdoor Equipment

Welcome to the world of play!

We are proud to present the latest NOVUM 2025 catalog – filled with inspiration, innovative solutions, and equipment that transforms any playground into a space full of joy and creativity.

Our offering features the newest additions, from majestic towers inviting thrilling climbs to brand-new ships and unique playground collections designed for both toddlers and older children. Among the novelties, you will also find eco-friendly solutions – playgrounds made from recycled materials, created with the future of our planet in mind.

Let our projects inspire you to create spaces that bring joy to children and support their holistic development.

Ecological approach

We place great importance on caring for the natural environment. Our approach to designing and manufacturing playgrounds is based on sustainable, responsible choices of materials and processes that minimize our impact on the planet.

We use wood from certified, renewable sources, ensuring that the natural wealth of forests remains intact. Our raw material sourcing processes are carefully monitored to support sustainable forest management. We hold the FSC® certification. FSC® establishes standards based on the principles of responsible forest management, supported by environmental, social, and economic stakeholders.

One of the key aspects of our production is the use of recycled materials. The steel used in our products contains 30 to 40% reclaimed materials. HDPE panels and posts in our ECO collections are made from recycled fishing nets, as well as processed textiles and plastic waste.

We pay special attention to ensuring that our delivery processes are also environmentally friendly. Our delivery fleet is dispatched only when fully loaded, reducing CO2 emissions and minimizing our carbon footprint. This approach makes our transport solutions both efficient and planet-friendly.

Furthermore, as a company, we hold the ISO 9001:2015 quality certification, which confirms our commitment to continuous process improvement and adherence to the highest quality standards, all while respecting the environment.

Development and education

Our playgrounds are not just spaces for active recreation but also unique educational tools that support the holistic development of children. Each piece of equipment is designed to stimulate physical growth as well as cognitive, social, and emotional skills. This way, play becomes an integral part of the learning process.

Physical development

Our playgrounds support the comprehensive physical development of children, encouraging outdoor activity. Ladders, swings, and slides help strengthen muscles, improve motor coordination, and develop a sense of balance.

Creative play

With manipulative elements such as game panels or interactive walls, children develop their imagination and manual skills. Playing in an environmentally friendly setting stimulates their creativity and spatial thinking.

Social development

Our playgrounds provide a space where children learn cooperation and communication with their peers. Playing together fosters teamwork skills and helps build social bonds.

Emotional balance

Playground activities have a positive impact on children's emotional development. By creating friendly and safe spaces, we help build self-confidence, foster patience, and develop resilience in facing challenges.

Exploration and learning

NOVUM's themed playgrounds provide children with the freedom to explore their surroundings while teaching them to live in harmony with nature. With elements inspired by the natural environment, children develop ecological awareness and learn to care for the world around them.

Production

Our production is based on an extensive machinery park, enabling us to execute even the most advanced and innovative projects. Complete control over the production process is crucial to us, which is why all playground components are manufactured in our own production facility. This allows us to guarantee not only high-quality craftsmanship but also the safety and durability of our equipment.

When selecting materials, we always choose the best available resources. We use only top-grade steel and wood, ensuring the strength and aesthetics of our playgrounds. Our professional machinery park, equipped with the latest technologies, enables us to create complex structures that are not only visually appealing but also safe and functional.

TRUMPF 3 kW laser

Equipped with automatic loading, beveling capabilities, thermal drilling, and threading for pipes and profiles up to 6500 mm in length.

FANUC welding robot

Dual-station robot for MIG, MAG, and PULSE welding of components with maximum dimensions of 1500x3400 mm.

Six professional CNC machining centers

Including two large-format Kimla machining centers.

Pneumatic blasting chamber

For blasting with dimensions of 3000x4000x8000 mm.

Zinc thermal spray metallizing device

For components of any size.

Powder coating facility

Featuring 3 booths, 2 ovens for powder coating components up to 4500 mm in length, and 2 ultrasonic washers.

Quality and guarantee

Choosing NOVUM is an investment in safety and play that stands the test of time. At NOVUM, safety is not just a standard – it is the foundation of everything we do. Our unwavering commitment to creating secure play environments is reflected in our products, which hold all necessary certifications, ensuring compliance with current standards. We also hold the ISO 9001:2015 certification.

The trust of our clients is of utmost importance to us, which is why we offer:

30-year warranty on stainless steel posts

10-year warranty on HPL/HDPE components

10-year warranty on acacia wood

5-year warranty on structural metal components

3-year warranty on wooden components

2-year warranty on all other components

Additionally, to ensure long-term use of our products, we guarantee a 10-year availability of spare parts.

We assure you that partnering with NOVUM is an investment in safety and play that will stand the test of time.

Components

Understanding how crucial safety and satisfaction are for our youngest users, we make every effort to ensure that our products are synonymous with the highest quality. We pay special attention to the selection of components used in our playgrounds. For us, choosing the best materials is not just a promise – it is the foundation on which we build our clients' trust.

SQUARE-PROFILE WOODEN POSTS

Load-bearing posts with a square profile made from selected, laminated wood with longitudinal grooves. Coated with colored glaze, they are crafted from knot-free, smooth wood, ensuring an aesthetic appearance and durability. The tops are protected with plastic caps.

ROUND-PROFILE STEEL POSTS

Steel posts with a round profile, coated with a layer of zinc and powder-painted. The tops are protected with plastic caps.

ROUND-PROFILE WOODEN POSTS

Load-bearing posts with a round profile made from selected, laminated wood with longitudinal grooves. Coated with colored glaze, they are crafted from smooth, selected wood. The tops are protected with plastic caps.

STAINLESS STEEL POSTS I

Load-bearing posts made of stainless steel with a round profile, finished with HDPE components.

ROBINIA ACACIA POSTS

High-quality, durable acacia wood. The beams and posts feature a natural, irregular shape, giving them a unique character. They require no maintenance.

STAINLESS STEEL POSTS II

Load-bearing posts made of stainless steel with a round profile, topped with unique wooden elements featuring a tapered shape.

CORE-FREE WOODEN POSTS

Load-bearing posts with a square profile made from core-free pine wood, vacuum-pressure impregnated to significantly extend the wood's lifespan and protect it from moisture, fungi, and mold.

PINEWOOD BOARDS

Pinewood boards, vacuum-pressure impregnated. This method preserves their natural aesthetics while significantly enhancing their durability.

RECYCLED POSTS

Made from composite material derived from recycled textiles and plastic waste. This combination acts as reinforcement within the structure of the posts, making them exceptionally sturdy. They are weather-resistant and require no maintenance.

ALDER WOOD BOARDS

Used in the platforms of the Retro collection. They undergo precise and detailed processing, making them exceptionally durable, weather-resistant, and wear-resistant.

SQUARE-PROFILE STEEL POSTS

Load-bearing posts made of square-profile steel, galvanized and powder-coated. The tops are secured with fitted plastic caps.

ROBINIA ACACIA WOOD BOARDS

Exceptionally smooth Robinia acacia wood boards with rounded edges and unique grain patterns, naturally resistant to weather conditions, insects, and fungi. They require no impregnation.

STEEL COMPONENTS

All steel components are galvanized and powder-coated with structural paint.

ANCHORS

Wooden posts are mounted on galvanized steel anchors, which isolate the wood from the ground.

HDPE

Roof and guard panels made from highly durable and weather-resistant HDPE polyethylene boards.

HPL

High-pressure laminate (HPL) boards made from duroplastic, layered high-pressure laminate, offering exceptional resistance to changing weather conditions. They are rot-proof and corrosion-resistant.

PLEXIGLASS

Organic/acrylic glass in the form of colorful, transparent panels, dyed throughout the material. UV-resistant.

ROPES

Polypropylene ropes reinforced with a steel core, with connectors made of high-quality plastic and aluminium.

ANTI-SLIP PLYWOOD

Waterproof material with a hexagonal pattern, used in platforms. Extremely durable and wear-resistant.

ANTI-SLIP HPL

Weather-resistant material used in platforms, mounted on a metal frame. Extremely durable and wear-resistant, with a top layer featuring an aesthetic hexagonal pattern.

POLYETHYLENE SLIDES

Slides made of colorful polyethylene (PE), resistant to impacts, scratches, and changing weather conditions.

HANDLES AND GRIPS

Made of high-quality polyamide, characterized by high resistance to wear and temperature variations. They have anti-slip properties.

STAINLESS STEEL SLIDES

Made entirely of stainless steel with an exceptionally smooth surface. Highly resistant to changing weather conditions.

STEEL AND HDPE SLIDES

Slides with stainless steel sliding surface and HDPE sides. The sliding surface is reinforced with channel bars, and a sealing gasket is added to dampen noise and reduce vibrations.

CAPS

Screw covers made of high-quality PE plastic. Resistant to damage and weather conditions.

FITTINGS

All fittings and connectors are made of stainless steel.

PORTHOLES

Made of transparent, durable, UV-resistant polycarbonate (PC).

TUNNELS

Dual-layer, structural tunnels made of polyethylene and polypropylene (PE, PP). Highly resistant to impacts, abrasion, and changing weather conditions.

CLIMBING STONES

Made of resin and quartz sand, available in various shapes and colors. Extremely durable and weather-resistant.

SWING SEATS

Made of thermoplastic vulcanizate (TPV) molded using injection technology. The seats are reinforced with an injection-molded PA insert. Chains are hot-dip galvanized.

Designing

STEP 1

Idea

Everything starts with an idea. Consider what functions the playground should fulfill and who will be using it. Need support with this? We are at your service!

STEP 2

Selection of equipment and safety surfaces

When choosing specific equipment, it's important to consider not only their appeal but also safety and durability. In our offer, you'll find a wide range of certified playground equipment that meets all current standards. Unsure which equipment to choose? Wondering which safety surface is necessary? Feel free to contact us! Our experienced consultants will guide you and tailor the offer to your needs and budget.

STEP 3

Project

Once the idea is defined, it's time for the design. Take advantage of our professional support in designing your playground—we will consider the site conditions based on the map, place the equipment on the plan—keeping in mind safety zones, technical requirements, and attractive solutions that meet the needs of users. Our experience allows us to create play spaces that are not only safe but also support children's development.

STEP 4

Visualization

We have experience in creating professional, photorealistic 3D visualizations of playgrounds. With these, you can see how the playground will look in your location and have the opportunity to use the provided graphic materials for advertising purposes.

READY!

Project for your playground is ready!

Contact us to start the implementation of your investment!

A few words about safe surfaces for playgrounds

Ensuring proper ground cover around playground equipment is essential for safety, as outlined by the PN-EN 1176 standard. The type of surface selected depends primarily on the height of free fall, which can be found in the technical specifications of our equipment. For a maximum fall height exceeding 1 meter, we recommend using one of the following materials:

LOOSE MATERIALS

TYPES: Sand, bark, wood chips, shredded rubber, or gravel
KEY INFORMATION: Specific details are provided in the table below.

Material type	Additional information in mm	Minimum thickness in mm	Minimum fall height in mm
Concrete / stone / asphalt		-	≤ 600 (EN1176)
			≤ 1000 (EN16630)
Soil		-	≤ 1000 (EN1176)
			≤ 1200 (EN11630)
Turf		-	≤ 1000 (EN1176)
			≤ 1500 (EN11630)
Bark	grain size from 20 to 80	200 + 100 for movements	≤ 2000
		300 + 100 for movements	≤ 3000
Woodchips	grain size from 5 to 30	200 + 100 for movements	≤ 2000
		300 + 100 for movements	≤ 3000
Sand or gravel	grain size from 0,2 to 8	200 + 100 for movements	≤ 2000
		300 + 100 for movements	≤ 3000

WHAT TO KEEP IN MIND? Loose material surfaces require regular checks to maintain the correct level and replenish any shortages. However, due to their relatively low installation cost, these surfaces are very popular and widely used.

SYNTHETIC MATERIALS

TYPES: Poured surfaces or rubber tiles.

KEY INFORMATION: Available in a wide range of colors, synthetic surfaces are low-maintenance and durable.

WHAT TO KEEP IN MIND? Regular cleaning is necessary to remove trash, such as broken glass, but beyond that, maintenance is minimal.

Material type	Additional information in mm	Minimum thickness in mm	Minimum fall height in mm
SYNTHETIC MATERIALS	according to the head injury criteria (HIC) as defined in the standard	-	≤ 3000 critical fall height according to test

ARTIFICIAL GRASS

KEY INFORMATION: A more affordable option compared to synthetic surfaces.
WHAT TO KEEP IN MIND? While cost-effective, artificial grass is not maintenance-free. It requires periodic filling, replenishment, and regular combing using specialized tools.

Material type	Additional information in mm	Minimum thickness in mm	Minimum fall height in mm
ARTIFICIAL GRASS	synthetic grass on a special foundation	-	≤ 3000 critical fall height according to test

Inspections

The proper technical condition of a playground is crucial for the safety of its users. According to the regulations derived from the PN-EN-1176-1 standard, in order to enhance the safety of children on playgrounds, it is recommended that the owner or manager of the playground follows the guidelines of this manual and conducts appropriate inspections according to the schedule below.

1

Regular inspection

The purpose of a visual inspection is to identify obvious hazards that could result from vandalism, weather damage, or littering of the playground (such as broken glass). The inspection should be carried out at least once a week.

2

Functional inspection

A functional inspection is a review aimed at checking the functionality and stability of the equipment, particularly focusing on wear and tear. The inspection should be carried out quarterly. The inspection covers the following: cleanliness, gaps between the equipment and the ground surface, the condition of the surface, exposed foundations, sharp edges, missing structural elements, excessive wear of moving parts, and the completeness and integrity of the structure.

3

Annual main inspection

An inspection conducted at intervals not exceeding 12 months is intended to assess the overall safety level of the equipment, the condition of the foundations, surfaces, the impact of weather conditions, signs of decay or corrosion, as well as changes in safety levels resulting from repairs or replaced components. The main inspection should be carried out by individuals with knowledge of current standards and appropriate experience.

Important!

We remind you that maintaining a playground inspection logbook is an important tool for conducting inspections, where the date, remarks, and details of the person conducting the inspection are recorded. The above procedures are the essential minimum to ensure that children can play safely and carefree.

Transport and installation

We understand that comprehensive service is the key to the success of any playground project. That's why we offer additional paid services for transport and installation. This ensures the highest quality and safety at every stage of the investment—from delivering the equipment to the final destination to professional installation. It's worth noting that by choosing our professional services, you're investing in the certainty that the playground will serve safely for many years. We ensure that the flexibility of our offer allows it to be tailored to individual needs and financial possibilities, guaranteeing the highest quality of execution.

Packing

It is important to us that every component of our playgrounds reaches the customer in perfect condition. Therefore, our quality control experts closely supervise the process of securing the loads. The packing method we use guarantees that all elements of the order are properly protected against shifting and damage.

Delivery

We make every effort to ensure that the delivery process is both eco-friendly and efficient. Our transport solutions aim to minimize the carbon footprint, which is why our delivery fleet only hits the road when fully loaded, reducing CO2 emissions and contributing to the protection of our planet. When placing an order, we provide information regarding the delivery time and the expected date of equipment delivery. The method, date and cost of delivery are each time agreed by the Parties before shipment. We comprehensively organize transport to the place indicated by the Client. However, the full cost of transportation is borne by the Customer. The customer is obliged to collect the finished product within 2 weeks of packing it. After this time, storage costs will begin to accrue.

Installation

Proper installation of playground equipment is crucial not only for maintaining the warranty but, most importantly, for the safety of children. That's why we include professional and comprehensive installation instructions with the ordered equipment.

The Terra collection was created out of the need to design an inspiring space that combines closeness to nature, education, and uninhibited play. The idea for this unique series stemmed from our passion for promoting values that contribute to the holistic development of children. In the Terra collection, we have combined the principles of Montessori and Reggio pedagogy, creating products that inspire children to explore the world and learn through practical experiences. As a result, children have the opportunity to develop their skills in an atmosphere of respect, independence, and curiosity. Terra supports and provides opportunities for independent action, fostering a sense of responsibility and autonomy.

NOVUM Sand Laboratories, with their thoughtful design and colorful aesthetics, are perfectly suited to the needs of young children. The compact size of these devices makes them safe and accessible for little ones just beginning to explore the world. The ideal location for installing these unique tables is near sandboxes, where the natural material for play is easily accessible. Moreover, the Sand Laboratories are designed for versatile play. Although sand is their main medium, these tables are perfect for playing with pebbles, leaves, sticks, and other natural elements that children can find outdoors.

Construction

Panels, tabletops

Construction

Load-bearing posts made of stainless steel 33.7 x 2 mm, finished with plastic caps.

Panels and Tabletops

Made from flexible highpressure polyethylene HDPE (15 mm).

Special connectors

Made of high-quality plastic, these connect the structure with HDPE panels.

Steel Components

Made from stainless steel.

Anchoring

Directly in the ground.

Charming dinosaur designs will transport little ones into the fascinating world of prehistoric adventures, ensuring safe and educational play. The Dino collection, with its sturdy structural elements and thoughtful design, is the perfect choice for nurseries and early education institutions. The equipment is designed to stimulate children's curiosity and encourage them to discover new skills by overcoming various obstacles. It's a wonderful opportunity to develop motor coordination, balance, and cognitive abilities in a friendly and inspiring environment.

Construction

Safety Panels

Construction

Load-bearing posts made of steel pipes with a diameter of 38 mm, protected against corrosion through galvanizing and powder coating.

Platforms

Made of anti-slip plywood with a thickness of 18 mm, mounted on a metal frame.

Safety Panels

Panels made from flexible highpressure polyethylene HDPE (15 mm).

Slides

Sliding surfaces made from stainless steel 2 mm, sides made from HDPE 19 mm.

Tunnels

Dual-layer, structural tunnels
Made of polypropylene (PP).

Anchoring

Directly in the ground.

The URBI collection is a new line of urban playgrounds. The design of the equipment comes in two options – on wooden posts in walnut color or metal ones available in three modern colors, perfectly suited to the character of urban landscapes.

Within the URBI collection, we find sets for children of various ages – from small, low structures for the youngest, to larger, more complex sets offering plenty of challenges for older users. These sets provide versatile play, stimulating physical development, creativity, and social interactions among children.

Construction

Roofs and safety panels

Metal version

Posts made of steel with a cross-section of 90x90 mm, galvanized and powder-coated. The tops are covered with plastic caps. Anchored directly into the ground.

Wooden version

Posts made of laminated wood with a square cross-section of 90x90 mm, treated with a wood protection agent, and covered with plastic caps at the top. Anchored below ground level, on a steel anchor.

Platforms

Made of anti-slip plywood with a thickness of 18 mm, mounted on a metal frame.

Slides

Sliding surfaces made from stainless steel 2 mm, sides made from HDPE 15 mm.

Roofs and Safety Panels

Panels made from flexible highpressure polyethylene HDPE (15 mm).

Additional elements:

- 16 mm polypropylene ropes with a steel core;
- 500 mm diameter portholes made of polycarbonate;
- PP plastic tunnels.

The solid yet lightweight design of the Verto collection not only impresses with its modern aesthetics but, most importantly, encourages carefree play, bringing joy to the youngest users. The structure is based on stainless steel posts, resistant to weather conditions, finished with elegant, uniquely tapered caps made from high-quality plastic. At the highest points of the sets, we can see beautiful, durable HPL laminate leaves, with a linear motif also featured in the safety barriers. The minimalist color scheme, carefully selected and well-combined materials, along with the open-frame structure of the equipment, ensure that the collection fits perfectly in both intimate and larger public spaces.

Construction

Roofs and safety panels

Slide sides

Construction

Load-bearing posts made of stainless steel with a diameter of 76.1 mm, finished with distinctive HDPE 19 mm covers.

Platforms

Made of anti-slip HPL panels with a thickness of 12 mm, mounted on a metal frame.

Safety panels and decorative leaves

Panels made of 8 mm thick HPL laminate.

Slides

Slides made of 1.5 mm thick stainless steel, with sides made of 19 mm HDPE and 8 mm HPL laminate.

Additional elements:

- 16 mm polypropylene ropes with a steel core;
- high-quality climbing stones.

Anchoring

Directly in the ground.

MPZ is a complete, ready-to-install playground based on a modular construction system that allows for installation directly in the ground WITHOUT THE NEED for any earthworks. MPZ eliminates the need for complex, multi-layered, costly foundations made of aggregates, as well as the requirement to lay foundations for the equipment. The system features a safe SBR+EPDM rubber surface, as required by the EN 1177 standard.

This solution **SIGNIFICANTLY REDUCES** installation costs and **SHORTENS** the construction time!

The design is based on leveled anchors mounted on the ground, to which frames with safe surfaces and playground equipment are attached. The individual components will be delivered to the construction site in the form of ready-made prefabricates, designed for quick assembly on-site using connection elements. The developed technology allows for a significant reduction in the time needed to build the finished playground.

MPZ also enables easy disassembly of equipment for relocation to other areas and greatly simplifies necessary repairs (a damaged module can be easily removed and replaced with a new one without the need to close the playground for many days).

The devices included in the 12x12 playground:

- Carousel
- Nest swing
- Playset
- Trampoline
- Spring rider
- 2 benches
- Seesaw swing
- Fence
- Information board/regulations

A thematic line of equipment that will take little ones on an extraordinary journey through the world of space. A rocket flight, an encounter with UFOs, a visit to a space station, or a moonwalk are just some of the attractions offered by the new collection. Its undeniable advantage is the ability to explore a cohesive environment inspired by space through movement, manipulative games, discovering cosmic curiosities, and uninhibited play as explorers of the universe.

HIGH TOWERS

The thrilling climb to the top of the towering structure is a real treat for any enthusiast of good fun. By overcoming numerous obstacles such as ladders, rope entrances, and climbing nets, children not only have a great time but also develop their motor skills, learn to assess risks, and strengthen their muscles. Each tower consists of several levels, providing endless play opportunities and a sense of achievement. The highlight of every adventure is the view from the top and the exciting slide down.

NOVUM's tall towers are not just places of play, but also spaces where children can overcome their weaknesses, build courage, and learn independence. These are the perfect structures to enrich any playground, whether in urban, school, or park settings.

Colours

Construction

Panels, roofs

Tower structure in the metal version

Based on massive, metal posts with a diameter of 114 mm, protected with a layer of zinc and powder-coated. Anchored directly into the ground.

Tower structure in the wooden version

Load-bearing posts made of laminated wood with a square cross-section of 90x90 mm. Mounted on steel anchors placed below the ground surface.

Tower structure in the Robinia version

Load-bearing posts made of high-quality stainless steel with a diameter of 102 mm, finished with unique wooden elements with a tapered shape. Mounted directly into the ground.

Platforms

Non-slip platforms 18 mm on metal frames.

Roofs and safety panels

Panels in flexible high pressure polyethylene HDPE 15 mm or made of Robinia acacia wood planks.

Additional elements:

- 16 mm polypropylene ropes with a steel core;
- high-quality climbing stones.

Slides

- slides with stainless steel slide 1,5 mm and HDPE elements 19 mm;
- PE tunnel slide;
- of stainless steel.

The Ferrum collection is an excellent choice for any urban playground or other public spaces that value high quality, durability, and aesthetic appeal. These reliable and attractive pieces of equipment not only brighten the space but also offer young users a range of developmental benefits. The perfect collection for older children!

Colours

Construction

Panels

Construction

Round load-bearing posts with a diameter of 114.3 mm made of S235 steel, galvanized and powder-coated. The tops are finished with plastic caps.

Platforms

Non-slip platforms 18 mm on metal frames.

Panels

Flexible high-pressure polyethylene (HDPE).

Additional elements:

- 16 mm polypropylene ropes reinforced with a steel core;
- high-quality climbing stones;
- stainless steel tube descent.

Anchoring

Directly in the ground.

Collection features

Age of users

Galvanized steel, powder-coated

ROBINIO

The ROBINIO collection is an exclusive series of equipment designed for demanding users. Interesting, challenging entrances, varied climbing walls, and unconventional crossings stimulate movement, strategic thinking, and engagement in overcoming obstacles. The massive steel structural posts and beautiful, yet durable acacia wood with its unique appearance give the collection a prestigious character. The ROBINIO collection encourages physical activity and creative thinking. It's the perfect solution for places that want to offer users more than just standard play – an experience full of challenges and adventures.

TRIANGULO

The new TRIANGULO collection features modern design, durability, and innovative construction solutions. The equipment's colors and shapes are inspired by nature. The open-frame safety barriers and canopies evoke organic forms and shapes. The structure of the equipment encourages active play, obstacle overcoming, and the improvement of physical fitness and coordination.

Colours

Construction

Roofs and safety panels

Slides

Construction

Double-grooved, square 90x90 mm posts made of core-free wood, vacuum-pressure impregnated.

Platforms

Made of pine wood planks, with dimensions of 75x75 cm.

Roofs and safety panels

Made of durable 8 mm high-pressure laminate (HPL).

Slides

Made entirely of polyester laminate.

Additional elements:

- 16 mm polypropylene ropes reinforced with a steel core.

Anchoring

Posts mounted on galvanized steel anchors that isolate the wood from the ground. Anchored below ground level.

The QUECO collection is a unique line of equipment where plant motifs and charming bird characters create a cohesive, friendly aesthetic, perfectly blending with the natural surroundings. Each element – from the structural posts to the decorative details – is made from recycled materials to show that modernity and ecology can go hand in hand. The equipment in the Queco collection not only provides excellent play but also offers educational value.

Interesting crossings, manipulative walls, and slides provide safe and engaging challenges. The entire collection is maintained in a subtle, natural color scheme, enriched with accents of brown, green, gray, and delicate shades of orange and yellow.

Colours

Construction

Roofs and safety panels

Slides

Construction

Load-bearing posts 90 x 90 mm, made 100% from recycled materials (composite obtained from a combination of used textiles and plastic waste).

Roofs and safety panels

- green 100% recycled (15 mm HDPE made from fishing nets);
- gray HDPE 70% recycled.

Platforms

Non-slip platforms 18 mm on metal frames.

Slides

Stainless steel sliding surfaces with a thickness of 1.5 mm, sides made of 100% recycled HDPE (15 mm, produced from fishing nets).

Additional elements:

- 16 mm polypropylene ropes reinforced with a steel core.

Anchoring

Directly in the ground.

retro

Our latest playground line pays tribute to traditional craftsmanship and natural materials while introducing innovations that address the contemporary needs of sustainable development.

The sets in the Retro collection are made from carefully selected wood, which not only blends seamlessly with the surroundings but is also exceptionally durable due to the use of modern conservation methods. Each wooden element is protected from moisture and pests, ensuring the playground will provide safe play for many years.

The slides in the Retro collection are a unique example of our commitment to environmental protection. Made from HDPE recycled from fishing nets, they are not only durable and safe but also contribute to reducing plastic waste. This approach shows that play and environmental education can go hand in hand.

Quadro is a legendary collection that has enjoyed consistent popularity among our clients for many years. It is the perfect choice for those who appreciate proven solutions and classic design. Quadro combines durability, functionality, and aesthetic appeal, making it a favored option for playgrounds in schools and public spaces.

The equipment is available in three versions to choose from: with strong wooden posts featuring a square cross-section made from grooved, laminated wood, durable galvanized and powder-coated steel, or a recycled version.

The Quadro collection is an excellent choice for those looking for reliable and aesthetically pleasing solutions. Thanks to its versatility and adaptability, the Quadro collection is widely chosen for both modern and more traditional spaces.

Slides side

Construction - wood version

Load-bearing square posts with a cross-section of 90x90 mm made of laminated wood, longitudinally grooved, finished with plastic caps at the top. Mounted on a steel anchor.

Construction - metal version

Load-bearing square posts with a cross-section of 90x90 mm made of S235 steel, galvanized and powder-coated, finished with plastic caps at the top. Mounted directly into the ground.

Construction - recycling version

Load-bearing posts 90 x 90 mm, made 100% from recycled materials in Umber color, mounted directly into the ground.

Roofs and safety panels

Made of flexible high pressure polyethylene HDPE 15 mm.

Platforms

Anti-slip plates 85 x 85 cm, 18 mm thick, mounted on a metal frame.

Slides

- made of stainless steel with a thickness of 1,5 mm, sides in gray HDPE 19 mm; green sides in HDPE 15 mm.
- PE tunnel slide.

Additional elements:

- 16 mm polypropylene ropes reinforced with a steel core;
- high-quality climbing stones;
- PE and PP tunnel;
- porthole made of polycarbonate.

Note!

It is possible to replace the standard slide with a PE plastic slide.

The Orbis collection offers comprehensive playground solutions for both toddlers and older children. It is a traditional collection, one of the first by NOVUM. The round posts give it a sense of lightness, while the wide variety of available equipment ensures it meets the needs of even the most demanding users. Platforms, towers, turrets, and extensive sets provide fantastic, uninhibited play. The collection was designed with integration and accessibility in mind, offering solutions that allow children with disabilities to fully participate in the fun.

Slides side

Construction - wood version

Load-bearing posts made of laminated wood, longitudinally grooved, with a diameter of 120 mm, finished with plastic caps at the top. Mounted on a steel anchor.

Construction - metal version

Load-bearing posts made of laminated wood, longitudinally grooved, with a diameter of 120 mm, finished with plastic caps at the top. Mounted on a steel anchor.

Roofs and safety panels

Made of flexible high pressure polyethylene HDPE 15 mm.

Additional elements:

- 16 mm polypropylene ropes reinforced with a steel core;
 - high-quality climbing stones;;
- tunnel made of oiled pine wood;
 - PE and PP tunnel;
- porthole made of polycarbonate.

Platforms

Anti-slip plates 85 x 85 cm, 18 mm thick, mounted on a metal frame.

Slides

With stainless steel slide 1,5 mm and HDPE elements 19 mm.

Note!

It is possible to replace the standard slide with a PE plastic slide. Ask for more details!

Designed with small lovers of pirate adventures and sea stories in mind, NOVUM ships transport children into a world of imagination, where everyone can become the captain of their own vessel. The ships are available on wooden posts (made of laminated, longitudinally grooved wood) or steel posts (galvanized and powder-coated), allowing for adaptation to different conditions and preferences. For those seeking the highest quality, stainless steel post models from the Robinio collection are also available.

Large, visible sails, steering wheels that not only attract attention but also fit perfectly into a themed playground. NOVUM ships are not just playground elements, but most importantly, spaces where children can safely explore, develop motor skills, and learn through play. Each ship is designed with attention to detail, making it not only visually appealing but also a functional and safe play area.

Colours

Construction

Safety panels

Slides

Ship construction - metal version

Based on massive metal posts with a diameter of 114 mm or a cross-section of 90 x 90 mm, protected with a layer of zinc and powder-coated. Anchored directly into the ground.

Ship construction - wood version

Load-bearing posts made of laminated wood with a square cross-section of 90 x 90 mm, or with a diameter of 120 mm. Mounted on steel anchors placed below the ground surface.

Ship construction - Robinio version

Load-bearing posts made of stainless steel with a diameter of 102 mm, topped with wooden elements featuring a beveled shape or irregularly shaped robinia wood. Installed directly in the ground.

Platforms

Anti-slip plates 85 x 85 cm, 18 mm thick, mounted on a metal frame.

Safety panels

Panels made of flexible high-pressure polyethylene HDPE (15 mm) or Robinia acacia wood planks.

Additional elements:

- 16 mm polypropylene ropes reinforced with a steel core;
- high-quality climbing stones;
- porthole made of polycarbonate.

Slides:

- with stainless steel slide and HDPE elements;
- PE tunnel slide;
- made of stainless steel.

NINJA WORKOUT

The NinjaWorkout equipment presents a challenge for both body and mind, offering a variety of obstacles that develop strength, agility, coordination, and competitive skills. They are perfect for strength, grip, and dynamic training, using obstacles commonly found in OCR competitions and professional Ninja courses. The collection includes equipment in two skill levels:

- Ninja Workout Starter – designed for younger users, offering adapted obstacles that guarantee challenging yet safe training and play.
- Ninja Workout Master – a higher difficulty course intended for adults and more advanced users who want to hone their skills at a professional level.

NinjaWorkout courses are an excellent option for people of all ages who want to combine physical activity with a lot of fun.

MiniClimbing Trials

NOVUM's Mini Rope Parks are an innovative solution for playgrounds, allowing the creation of unique obstacle courses that develop children's physical fitness and motor skills. Our equipment is available in two construction versions – with wooden or metal posts, enabling the park to be tailored to the aesthetic and needs of the space where it will be installed.

Thanks to their modular design, Mini Rope Parks can be freely configured by adding additional elements and creating expanded sets that will surprise with a variety of obstacles. The equipment is designed so that its use does not require specialized safety gear or additional service, making it a safe and convenient choice for playground managers.

Mini Rope Parks enhance children's strength, agility, balance, and endurance. Each obstacle overcome presents a new challenge, bringing immense joy and satisfaction to young users.

Colours

Construction

Construction - wood version

Load-bearing posts made of laminated, impregnated wood with a diameter of 140 mm.

Construction - metal version

Load-bearing posts made of steel with a diameter of 139.7 mm, galvanized and powder-coated.

Wooden version platforms

Steel frame with wooden edge beams.

Metal version platforms

HDPE plate with an anti-slip coating, resistant to UV rays.

Wooden version anchoring

On a steel anchor, mounted below the ground surface.

Metal version anchoring

Directly into the ground.

Additional elements:

- 16 mm polypropylene ropes reinforced with a steel core;
- chains made of stainless steel.

StreetWorkout is a professional collection of equipment designed for calisthenics training, which involves exercises using one's own body weight. These dynamic, impressive exercises target all muscle groups, while improving coordination, endurance, and strength.

With various elements, StreetWorkout equipment allows for the creation of a training space tailored to the needs of users as well as the specifics of the installation site. Our offer enables flexible configuration of sets depending on training and terrain requirements, making it ideal for both beginners and advanced athletes.

StreetWorkout equipment is available in three trendy colors – orange, yellow, and lime – giving it a modern, eye-catching look.

supplementary devices

Additional equipment such as spring rockers, swings, slides, carousels, and sandboxes are an integral part of every playground, making it even more attractive and functional. Each of these elements encourages physical activity and creative outdoor play, while also supporting the motor and social development of children.

Colours

Construction

Panels

Steel construction

Load-bearing posts made of steel, protected against corrosion through galvanizing and powder coating.

Wooden construction

Load-bearing posts made of laminated wood, treated with a protective agent.

Robinia construction

Load-bearing posts made of acacia wood. The diameter of the beams ranges from 12 to 20 cm due to their natural, irregular shape.

Slides

With a 1.5 mm thick stainless steel sliding surface and 19 mm thick HDPE sides. The slide structure is reinforced with channel bars, and a sealing gasket is used to dampen noise and reduce vibrations.

Panels

Made of highly durable, weather-resistant HDPE polyethylene, available in 12, 15, and 19 mm thicknesses.

Anchoring

Directly into the ground or on steel anchors.

Additional elements

- steel springs, galvanized and powder-coated, attached to an anchor mounted in the ground;
- polypropylene ropes with a steel core;
- handles and grips made of high-quality polyamide;
- swing seats made of thermoplastic vulcanizate (TPV), reinforced with a PA insert. Chains made of stainless steel.

Trampolines::

Trampolines are an excellent way to combine fun with physical activity. Jumping strengthens muscles, improves coordination, and releases a lot of positive energy. Thanks to their solid construction and durable materials, our trampolines perform well in playgrounds, parks, and recreational areas, creating a joyful space for everyone – regardless of age.

EPDM colours

Mat colors

Construction based on a solid steel frame.

Jumping mat with enhanced vandal resistance, made of durable, non-slip segments of synthetic material.

Hot-dip galvanized springs, suspended on a steel profile.

Shock-absorbing surface made of poured, seamless EPDM.

Installation directly into the ground (the jumping surface is level with the ground).

The elements of small architecture in our offer are characterized not only by durability and functionality but also by modern design, which perfectly complements various urban arrangements. They are an excellent addition to any investment, giving public spaces a cohesive and thoughtful character. In this catalog, we present: benches, park chairs and tables, trash bins, bicycle racks, fences, information boards, and regulations.

Colours

Construction

Wood

The construction is based on a solid steel frame, powder-coated.

Seasoned spruce planks, covered with protective wood paint (benches on page 355).

Selected alder wood (in colours: rosewood, teak, mahogany).

Fittings made of stainless steel.

The equipment is designed for either permanent installation or free-standing use.

The seats and backs of most benches in our offer are available in Mahogany color. If you would like to change the wood color to Teak or Rosewood, please inform us when placing your order.

Our outdoor gyms are an excellent investment in the health and well-being of residents, encouraging regular exercise in the fresh air and promoting a healthy lifestyle. Each piece of equipment is designed with safety, durability, and training efficiency in mind, offering a wide range of exercises for people of all ages and fitness levels

The equipment is available in two variants: mounted on a pylon and free-standing.

With pylon

Free-standing

Colours

Construction

Seats and backs

Construction

Load-bearing posts made of steel pipe with a diameter of 114.3 mm. Galvanized and powder-coated.

Pylon

A load-bearing element for fitness equipment, allowing the installation of two devices on either side. It also serves as an information board.

Treads

Made of stainless steel.

Seats and backs

Made of 19 mm HDPE plate.

Additional elements:

- high-quality vibration isolators – components that absorb and dampen vibration forces;
- equipped with two types of maintenance-free bearings – ball and tapered;
- connectors made of stainless steel.

Anchoring

Installation 30 cm below the ground surface into a concrete prefabricated block.

Collection features

Minimum height of users

Galvanized steel, powder-coated
